**PRESS NOTE**

**FIRST ADVANCE ESTIMATES OF NATIONAL INCOME, 2023-24**

The National Statistical Office (NSO), Ministry of Statistics and Programme Implementation is releasing in this Press Note the First Advance Estimates (FAE) of National Income for the financial year 2023-24, both at Constant (2011-12) and Current Prices.

2. Estimates of Gross/ Net National Income and Per Capita Income along with Gross Value Added (GVA) at Basic Prices by kind of economic activity and the Expenditure Components of GDP for the years 2021-22, 2022-23 and 2023-24 at Constant (2011-12) and Current Prices are given in **Statement 1 to 4**

3. Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated to attain a level of ₹171.79 lakh crore, as against the Provisional Estimate of GDP for the year 2022-23 of ₹160.06 lakh crore, released on 31<sup>st</sup> May, 2023. The growth in real GDP during 2023-24 is estimated at 7.3 per cent as compared to 7.2 per cent in 2022-23.

4. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at ₹296.58 lakh crore, as against the Provisional Estimate of GDP for the year 2022-23 of ₹272.41 lakh crore, released on 31<sup>st</sup> May, 2023. The growth in nominal GDP during 2023-24 is estimated at 8.9 per cent as compared to 16.1 per cent in 2022-23.

5. The Advance Estimates of National Income are indicator-based and are compiled using the benchmark-indicator method i.e. the estimates available for the previous year (2022-23) are extrapolated using the relevant indicators reflecting the performance of sectors. Data sourced from various Ministries/ Departments/ Private Agencies serve as valuable inputs in the compilation of these estimates. The sector-wise estimates have been compiled using indicators like (i) Index of Industrial Production (IIP), (ii) Financial performance of Listed Companies in the Private Corporate sector available for Q1 and Q2 of 2023-24, (iii) Crop production targets and First Advance Estimates of Crop Production for 2023-24, (iv) Production targets and summer season production estimates of Major Livestock Products for 2023-24 and (v) Fish Production, (vi) Production/ Consumption of Cement and Steel, (vii) Net Tonne Kilometres and Passenger Kilometres for Railways, (viii) Passenger and Cargo traffic handled by Civil Aviation, (ix) Cargo traffic handled at Major and Minor Sea Ports, (x) Sales of Commercial Vehicles, (xi) Bank Deposits & Credits, (xii) Accounts of Central & State Governments, etc., available for first 6-8 months of the financial year 2023-24. Percentage changes in the main indicators used in the estimation are given in the **Annexure**.

6. The total tax revenue used for GDP compilation includes non-GST revenue as well as GST revenue. The Budget Estimates of tax revenue for 2023-24 along with latest information available on the websites of Controller General of Accounts (CGA) and Comptroller and Auditor General of India (CAG) have been used for estimating taxes on products at current prices. For obtaining taxes on products at constant Prices, volume extrapolation is done using volume growth of taxed goods and services and aggregated to get the total volume of taxes. The total product subsidies were compiled using the latest information on major subsidies viz. Food, Urea, Petroleum and Nutrient based subsidy as available on CGA website and the expenditure incurred on subsidies by most States up to November, 2023 as available on CAG website along with the Centre/ State-wise BE provision for 2023-24. Information available on Revenue expenditure, Interest payments, Subsidies etc. based on detailed analysis of budget documents of Centre and States for 2023-24 were put to use for estimating Government Final Consumption Expenditure (GFCE).

7. However, these are early projections for 2023-24. Improved data coverage, actual tax collections and expenditure incurred on subsidies, data revisions made by source agencies etc. would have a bearing on subsequent revisions of these estimates. The First Revised Estimates for 2022-23 (benchmark year), due for release on 29.02.2024, may also lead to revision in growth rates reflected in FAE. Estimates are, therefore, likely to undergo revisions for the aforesaid causes in due course, as per the release calendar. Users should take this into consideration while interpreting the figures.

8. The Second Advance Estimates of National Income for the year 2023-24 and quarterly GDP estimates for the quarter October-December, 2023 (Q3 2023-24), along with First, Second and Third Revised Estimates of National Income, Consumption Expenditure, Saving and Capital Formation for the years 2022-23, 2021-22 and 2020-21 respectively will be released on 29.02.2024.

7. For compilation of SAE 2023-24, the Provisional Estimates of 2022-23 used at the time of FAE have been replaced by First Revised Estimates (FRE) 2022-23 which have been compiled using industry-wise/institution-wise detailed information. Thus, variations in SAE from FAE is attributed to revision of benchmark estimates and additional data available on various indicators like CPI, IIP, Revised Estimates of fiscal data, financial results of listed companies etc. used for compiling the estimates for 2023-24. The quarterly estimates of previous years along with the first and second quarter estimates of 2023-24 released earlier have also undergone revision in accordance with the revision policy of National Accounts.

8. The sector-wise estimates have been compiled using indicators like (i) Index of Industrial Production (IIP), (ii) Financial performance of Listed Companies in the Private Corporate sector available for Q1, Q2 and Q3 of 2023-24, (iii) Second Advance Estimates of Crop Production for

2023-24, (iv) Production targets as well as summer and rainy season production estimates of Major Livestock Products for 2023-24, (v) Fish Production, (vi) Production/ Consumption of Cement and Steel, (vii) Net Tonne Kilometers and Passenger Kilometers for Railways, (viii) Passenger and Cargo traffic handled by Civil Aviation, (ix) Cargo traffic handled at Major and Minor Sea Ports, (x) Sales of Commercial Vehicles, (xi) Bank Deposits & Credits, (xii) Accounts of Central & State Governments, etc., available for first 9-10 months of the financial year 2023-24. Year-on-Year growth rates (%) in the main indicators used in the estimation are given in the **Annexure A**.

9. The total tax revenue used for GDP compilation includes non-GST revenue as well as GST revenue. The Revised Estimates of tax revenue for 2023-24, as available in the Annual Financial Statement of the Central Government for 2024-25, latest available information on the websites of Controller General of Accounts (CGA) and Comptroller and Auditor General of India (CAG) have been used for estimating taxes on products at Current Prices. For compiling taxes on products at constant prices, volume extrapolation is done using volume growth of taxed goods and services. The total product subsidies were compiled using the latest information on major subsidies viz. Food, Urea, Petroleum and Nutrient based subsidy as available on CGA website and the expenditure incurred on subsidies by most States upto December, 2023 as available on CAG website along with the Centre/ State-wise RE and BE provision for 2023-24. Information on Revenue expenditure, Interest payments, Subsidies etc. from Centre and States for 2023-24 are used for estimating Government Final Consumption Expenditure (GFCE).

10. Improved data coverage, actual performance of various indicators, actual tax collections and expenditure incurred on subsidies in the following months and revision in input data made by source agencies will have a bearing on subsequent revisions of these estimates. Estimates are, therefore, likely to undergo revisions for the aforesaid causes in due course, as per the release calendar. Users should take these into consideration while interpreting the figures.

11. The next release of quarterly GDP estimates for the quarter January-March, 2024 (Q4 2023-24) and Provisional Estimates of National Income for the year 2023-24 will be on 31<sup>st</sup> May, 2024.

## **PART B**

### **FIRST REVISED ESTIMATES OF NATIONAL INCOME, CONSUMPTION EXPENDITURE, SAVING AND CAPITAL FORMATION, 2022-23**

**NOTE ON  
FIRST REVISED ESTIMATES OF NATIONAL INCOME,  
CONSUMPTION EXPENDITURE, SAVING AND CAPITAL FORMATION, 2022-23**

In this part, First Revised Estimates of National Income, Consumption Expenditure, Saving and Capital Formation for the financial year 2022-23 along with Second Revised Estimates for the financial year 2021-22 and Third Revised Estimates for the financial year 2020-21 (with Base Year 2011-12) are given.

2. The First Revised Estimates for the year 2022-23 have been compiled using industry-wise/institution-wise detailed information instead of using the benchmark-indicator method employed at the time of release of Provisional Estimates on 31<sup>st</sup> May, 2023. The estimates of Gross Domestic Product (GDP) and other aggregates for the years 2020-21 and 2021-22 have also undergone revisions on account of use of latest available datasets on agricultural production; industrial production (final results of ASI: 2020-21 and 2021-22); government data as available in budget documents (replacing Revised Estimates with actuals for the year 2021-22); comprehensive data available from various source agencies like Ministry of Corporate Affairs (MCA), Reserve Bank of India (RBI), National Bank for Agriculture and Rural Development (NABARD) etc. and additional data from State/UT Directorates of Economics and Statistics (DES).

3. The salient features of the revised estimates at aggregate level are as follows.

**Gross Domestic Product**

4. Real GDP or GDP at constant (2011-12) prices for the years 2022-23 and 2021-22 stands at ₹160.71 lakh crore and ₹150.22 lakh crore, respectively, showing a growth of 7.0 per cent during 2022-23 as compared to growth of 9.7 per cent during 2021-22.

5. Nominal GDP or GDP at current prices for the year 2022-23 is estimated at ₹269.50 lakh crore, against ₹235.97 lakh crore for the year 2021-22, showing a growth of 14.2 per cent during 2022-23 as compared to growth of 18.9 per cent during 2021-22.

**GVA and its Industry-wise Analysis**

6. At the aggregate level, nominal Gross Value Added (GVA) at basic prices has increased by 14.0 per cent during 2022-23 compared to growth of 18.8 per cent during 2021-22. Real GVA, i.e., GVA at constant (2011-12) prices, has increased by 6.7 per cent in 2022-23, compared to 9.4 per cent growth in 2021-22.

7. The shares of broad sectors of the economy in overall GVA during 2011-12 to 2022-23 and the annual growth rates during these periods are mentioned below:

Year	Sector-wise share in GVA at current prices (in %)			Sector-wise growth in GVA at constant (2011-12) prices (in %)				Aggregate GVA (₹ in lakh crore)
